

30/What is a major privacy concern related to CBDCs?

- A. High transaction fees
B. Inability to make international payments
C. Lack of digital wallets
D. Increased government surveillance

31/ What is one challenge of implementing CBDCs?

- A. Too much privacy
B. High adoption rate among the elderly
C. Cybersecurity risks
D. Lack of government involvement

32/ How do CBDCs differ from cryptocurrencies like Bitcoin?

- A. CBDCs are intelligent
B. CBDCs are decentralized while Bitcoin is centralized
C. CBDCs are issued by central banks while Bitcoin is not
D. CBDCs have a fixed supply like Bitcoin

33/ What is the key difference between centralized and decentralized exchanges in terms of regulatory compliance?

- A. Decentralized exchanges are government-controlled
B. Decentralized exchanges have to follow stricter regulations
C. Decentralized exchanges do not need to follow KYC requirements
D. Centralized exchanges do not need to follow KYC requirements

34/How do smart contracts on Ethereum execute?

- A. Manually by users
B. Through a centralized server
C. By miners during Proof-of-Work
D. Automatically when predefined conditions are met

35/ How do stablecoins facilitate DeFi activities?

- A. By minting memecoins
B. By providing a volatile store of value
C. By being used as collateral without price fluctuations
D. By staking for mining rewards

36/ What solution did Vitalik Buterin found to create the 2nd generation of blockchains?

- A. Gas fees
B. Kitkat
C. Zero Knowledge proof
D. Mining

37/ What is a Zero-Knowledge Proof (ZKP)?

- A. A skin on Fortnite
B. A system that encrypts data but still allows full visibility of the content
C. A type of algorithm used to reduce gas fees on the Ethereum network
D. A method where one party proves they know a secret without revealing the secret itself.

38/ How can you calculate the market cap of a token?

- A. Divide the total supply by the price
B. Add the circulating supply to the price
C. Subtract the burned tokens from the total supply
D. Multiply the circulating supply by the token's current price

39/ In a DeFi platform, what happens during a token unlock schedule?

- A. Tokens are permanently burned
B. Tokens are distributed over a specific time period
C. Tokens are staked to earn rewards
D. Tokens are sent back to the liquidity pool

40 / What was the result of the 2016 DAO attack on Ethereum?

- A. The Ethereum network was shut down permanently.
B. Ethereum developers patched the vulnerability without any chain split.
C. Ethereum hard forked, creating Ethereum (ETH) and Ethereum Classic (ETC).
D. The DAO attack was resolved without any changes to the Ethereum blockchain.

30/What is a major privacy concern related to CBDCs?

- A. High transaction fees
B. Inability to make international payments
C. Lack of digital wallets
D. Increased government surveillance

31/ What is one challenge of implementing CBDCs?

- A. Too much privacy
B. High adoption rate among the elderly
C. Cybersecurity risks
D. Lack of government involvement

32/ How do CBDCs differ from cryptocurrencies like Bitcoin?

- A. CBDCs are intelligent
B. CBDCs are decentralized while Bitcoin is centralized
C. CBDCs are issued by central banks while Bitcoin is not
D. CBDCs have a fixed supply like Bitcoin

33/ What is the key difference between centralized and decentralized exchanges in terms of regulatory compliance?

- A. Decentralized exchanges are government-controlled
B. Decentralized exchanges have to follow stricter regulations
C. Decentralized exchanges do not need to follow KYC requirements
D. Centralized exchanges do not need to follow KYC requirements

34/How do smart contracts on Ethereum execute?

- A. Manually by users
B. Through a centralized server
C. By miners during Proof-of-Work
D. Automatically when predefined conditions are met

35/ How do stablecoins facilitate DeFi activities?

- A. By minting memecoins
B. By providing a volatile store of value
C. By being used as collateral without price fluctuations
D. By staking for mining rewards

AVIS IMPORTANT AUX ETUDIANTS

- Chacune des feuilles de votre copie doit comporter une étiquette code à barres placée à l'endroit indiqué «coller ici votre code à barres».
- Une copie d'examen comporte une seule «feuille principale» et des «feuilles suites». Sur chacune de vos feuilles, le code à barres est obligatoire.
- Cette feuille d'examen est strictement personnelle. Elle ne doit comporter aucun signe distinctif. Elle doit être écrite en noir et/ou bleu.
- Le non respect de l'une de ces recommandations peut faire attribuer la note ZERO à l'épreuve.

ID.193 : V1

NOTE

19

Epreuve : FinTech / Classe : MIT-AIM

Enseignant : Firas BEN HIBA

Doc non autorisés / Durée de l'épreuve : 1H30 / Octobre 2024

1/ Who introduced the concept of blockchain technology?

- A. Vitalik Buterin
B. Satoshi Nakamoto
C. Charles Hoskinson
D. Gavin Wood

2/ What is the primary purpose of blockchain technology?

- A. Centralize control
B. Eliminate digital currency
C. Record data securely and transparently
D. Increase government regulation

3/ Bitcoin uses which consensus mechanism?

- A. Proof-of-Stake (PoS)
B. Proof-of-Authority (PoA)
C. Proof-of-Work (PoW)
D. Delegated Proof-of-Stake (DPoS)

4/ How many Bitcoins will ever be created?

- A. 10 million
B. 21 million
C. 100 million
D. Unlimited

Nom, prénom et signature
de l'enseignant correcteur

5/ What is the process of adding new transactions to the blockchain called?

- A. Staking ☒ Mining
B. Hashing ☐ D. Minting

6/ What is Bitcoin's supply characteristic?

- A. Inflationary ☐ C. Pegged to the US dollar
☒ B. Deflationary ☐ D. Backed by gold

7/ Who is the creator of Ethereum?

- A. Charles Hoskinson ☐ C. Hbib Migalo
☒ B. Vitalik Buterin ☐ D. Satoshi Nakamoto

8/ What innovation did Ethereum introduce that expanded the capabilities of blockchain?

- A. Proof-of-Work ☐ C. Mining pools
☒ B. Smart contracts ☐ D. Centralized applications

9/ Ethereum is considered a _____ generation blockchain.

- A. First ☐ C. Third
☒ B. Second ☐ D. Fourth

10/ What does Web3 emphasize compared to Web2?

- A. Centralized control ☐ C. Only social media interactions
☒ B. Increased regulation ☐ D. User empowerment and decentralization

11/ Which of the following is an example of a dApp?

- ☒ A. Uniswap ☐ C. Facebook
☐ B. Jumia ☐ D. All of the above

19/ What is over-collateralization in DeFi lending?

- A. No collateral required ☐ C. Providing collateral equal to the loan value
☒ B. Providing collateral greater than the loan value ☐ D. Providing collateral less than the loan value

20/ What are decentralized exchanges (DEXs)?

- A. Social media networks ☐ C. Exchanges that are controlled by governments
☒ B. Exchanges that only trade fiat currency ☐ D. Platforms for trading cryptocurrencies without a central authority

21/ What is staking in DeFi?

- A. Mining Bitcoin ☒ C. Locking up tokens to support a network
B. Creating NFTs ☐ D. Borrowing assets with no collateral

22/ What is a DAO?

- A. Donuts And Onions ☐ C. Decentralized Application Operator
☒ B. Digital Autonomous Organization ☐ D. Decentralized Autonomous Organization

23/ What is MiCA?

- A. A stablecoin ☒ C. A regulatory framework in the European Union
B. A DeFi protocol ☐ D. A cryptocurrency exchange

24/ What is the purpose of KYC in crypto regulation?

- A. To create new tokens ☐ C. To decrease transaction fees
☒ B. To verify the identity of users ☐ D. To increase market volatility

12/ What is Ethereum often referred to as?

- ☒ A. World computer ☐ C. Crypto token
B. Central bank ☐ D. Digital gold

13/ What is the primary purpose of stablecoins?

- ☒ A. Provide stability in value ☐ C. Increase mining rewards
B. Replace Bitcoin ☐ D. Increase price volatility

14/ Which of the following is an example of a fiat-backed stablecoin?

- A. DAI ☐ C. ETH
B. PEPE ☒ D. USDT

15/ What type of stablecoin is DAI?

- ☒ A. Crypto-backed ☐ C. Fiat-backed
B. Algorithmic ☐ D. Non-fungible

16/ How do crypto-backed stablecoins maintain stability?

- A. Through fiat reserves ☒ C. By over-collateralizing
B. c) By reducing supply ☐ D. By increasing price volatility

17/ What does DeFi stand for?

- A. Delegated Finance ☐ C. Digital Finance
B. Direct Finance ☒ D. Decentralized Finance

18/ What is the primary benefit of using DeFi protocols?

- A. Centralized authority ☒ C. Transparency and reduced costs
B. Intermediary services ☐ D. High transaction fees

25/ Which type of exchange is required to comply with KYC and AML regulations?

- ☒ A. Centralized Exchange (CEX) ☐ C. Peer-to-peer Network
B. Decentralized Exchange (DEX) ☐ D. Blockchain Explorer

26/ Why is regulation important in the crypto industry?

- A. To restrict innovation ☐ C. To eliminate all cryptocurrencies
☒ B. To prevent fraud and protect consumers ☐ D. To increase transaction fees

27/ What does AML stand for?

- ☒ A. Anti-Money Laundering ☐ C. Automated Market Liquidity
B. Allergic to Monday Life ☐ D. Alternative Monetary Legislation

28/ Which regulatory framework aims to create a unified approach to crypto assets in Europe?

- A. SEC ☒ C. MICA
B. UEFA Champions League Europe ☐ D. FCA

29/ What is a CBDC?

- A. Crypto Backed Digital Coin ☐ C. Collateralized Blockchain Digital Cash
☒ B. Central Bank Digital Currency ☐ D. Cats Baking Delicious Cookies
