NOTE

20

AVIS IMPORTANT AUX ETUDIANTS

- Chaque des feuilles de votre copie doit comporter une étiquette code à barres placée à l'endroit indiqué «coller ici votre code à barres».
- Une copie d'examen comporte une seule «feuille principale» et des «feuilles suites». Sur chacune de vos feuilles, le code à barres est obligatoire.
- Cette feuille d'examen est strictement personnelle. Elle ne doit comporter aucun signe distinctif. Elle doit être écrite en noir et/ou bleu.
- Le non respect de l'une de ces recommandations peut faire attribuer la note ZERO à l'épreuve.

Epreuve : FinTech / Classe : MIT-AIM

Enseignant : Firas BEN HIBA

Doc non autorisés / Durée de l'épreuve : 1H30 / Octobre 2024

toutes les réponses sont données sur la qst même

1/ Who introduced the concept of blockchain technology?

- A. Vitalik Buterin C. Charles Hoskinson
☒ B. Satoshi Nakamoto D. Gavin Wood

2/ What is the primary purpose of blockchain technology?

- A. Centralize control ☒ C. Record data securely and transparently
 B. Eliminate digital currency D. Increase government regulation

3/ Bitcoin uses which consensus mechanism?

- A. Proof-of-Stake (PoS) ☒ C. Proof-of-Work (PoW)
 B. Proof-of-Authority (PoA) D. Delegated Proof-of-Stake (DPoS)

4/ How many Bitcoins will ever be created?

- A. 10 million C. 100 million
☒ B. 21 million D. Unlimited

- 36/ What solution did Vitalik Buterin found to create the 2nd generation of blockchains?**
☒ A. Gas fees
☒ B. Kitkat
☒ C. Zero Knowledge proof
☐ D. Mining
- 37/ What is a Zero-Knowledge Proof (ZKP)?**
 A. A skin on Fortnite
 B. A system that encrypts Ethereum network
☒ C. A type of algorithm used to reduce gas fees on the data but still allows full visibility of the content.
☒ D. A method where one party proves they know a secret without revealing the secret itself.
- 38/ How can you calculate the market cap of a token?**
 A. Divide the total supply by the price
☒ B. Add the circulating supply to the price
☒ C. Subtract the burned tokens from the total supply
☒ D. Multiply the circulating supply by the token's current price
- 39/ In a DeFi platform, what happens during a token unlock schedule?**
 A. Tokens are permanently burned
☒ B. Tokens are distributed over a specific time period
☒ C. Tokens are staked to earn rewards
☒ D. Tokens are sent back to the liquidity pool
- 40/ What was the result of the 2016 DAO attack on Ethereum?**
☒ A. The Ethereum network was shut down permanently.
☒ B. Ethereum developers and Ethereum Classic (ETC) resolved the attack without any changes to the Ethereum blockchain.
☒ C. Ethereum hard forked, creating Ethereum (ETH) and Ethereum Classic (ETC).
☒ D. The DAO attack was resolved without any changes to the Ethereum blockchain.
- 41/ What was the result of the 2016 DAO attack on Ethereum?**
☒ A. The Ethereum network was shut down permanently.
☒ B. Ethereum developers and Ethereum Classic (ETC) resolved the attack without any changes to the Ethereum blockchain.
☒ C. Ethereum hard forked, creating Ethereum (ETH) and Ethereum Classic (ETC).
☒ D. The DAO attack was resolved without any changes to the Ethereum blockchain.

- 30/ What is a major privacy concern related to CBDCs?**
☒ A. High transaction fees
☒ B. Inability to make international payments
☒ C. Lack of digital wallets
☒ D. Increased government surveillance
- 31/ What is one challenge of implementing CBDCs?**
☒ A. Too much privacy
☒ B. High adoption rate among the elderly
☒ C. Cybersecurity risks
☒ D. Lack of government involvement
- 32/ How do CBDCs differ from cryptocurrencies like Bitcoin?**
☒ A. CBDCs are intelligent
☒ B. CBDCs are decentralized
☒ C. CBDCs are issued by central banks while Bitcoin is not
☒ D. CBDCs have a fixed supply like Bitcoin while Bitcoin is centralized
- 33/ What is the key difference between centralized and decentralized exchanges in terms of regulatory compliance?**
☒ A. Decentralized exchanges are government-controlled
☒ B. Centralized exchanges are subject to KYC and AML regulations, while decentralized exchanges often are not
☒ C. Decentralized exchanges have to follow stricter regulations
☒ D. Centralized exchanges do not need to follow regulations
- 34/ How do smart contracts on Ethereum execute?**
☒ A. Manually by users
☒ B. Through a centralized server
☒ C. By miners during Proof-of-Work
☒ D. Automatically when predefined conditions are met
- 35/ How do stablecoins facilitate DeFi activities?**
☒ A. By minting memecoins
☒ B. By providing a volatile store of value
☒ C. By being used as collateral without price fluctuations
☒ D. By staking for mining rewards

5/ What is the process of adding new transactions to the blockchain called?

- A. Staking
- B. Hashing
- C. Mining
- D. Minting

6/ What is Bitcoin's supply characteristic?

- A. Inflationary
- B. Deflationary
- C. Pegged to the US dollar
- D. Backed by gold

7/ Who is the creator of Ethereum?

- A. Charles Hoskinson
- B. Vitalik Buterin
- C. Hal Buterin
- D. Satoshi Nakamoto

8/ What innovation did Ethereum introduce that expanded the capabilities of blockchain?

- A. Proof-of-Work
- B. Smart contracts
- C. Mining pools
- D. Centralized applications

9/ Ethereum is considered a _____ generation blockchain.

- A. First
- B. Second
- C. Third
- D. Fourth

10/ What does Web3 emphasize compared to Web2?

- A. Centralized control
- B. Increased regulation
- C. Only social media interactions
- D. User empowerment and decentralization

11/ Which of the following is an example of a dApp?

- A. Uniswap
- B. Juma
- C. Facebook
- D. All of the above

19/ What is over-collateralization in DeFi lending?

- A. No collateral required
- B. Providing collateral greater than the loan value
- C. Providing collateral equal to the loan value
- D. Providing collateral less than the loan value

20/ What are decentralized exchanges (DEXs)?

- A. Social media networks
- B. Exchanges that only trade fiat currency
- C. Exchanges that are controlled by governments
- D. Platforms for trading cryptocurrencies without a central authority

21/ What is staking in DeFi?

- A. Mining Bitcoin
- B. Creating NFTs
- C. Locking up tokens to support a network
- D. Borrowing assets with no collateral

22/ What is a DAO?

- A. Donuts And Onions
- B. Digital Autonomous Organization
- C. Decentralized Application Operator
- D. Decentralized Autonomous Organization

23/ What is MiCA?

- A. A stablecoin
- B. A DeFi protocol
- C. A regulatory framework in the European Union
- D. A cryptocurrency exchange

24/ What is the purpose of KYC in crypto regulation?

- A. To create new tokens
- B. To verify the identity of users
- C. To decrease transaction fees
- D. To increase market volatility

12/ What is Ethereum often referred to as?

- A. World computer
- B. Central bank
- C. Crypto token
- D. Digital gold

13/ What is the primary purpose of stablecoins?

- A. Provide stability in value
- B. Replace Bitcoin
- C. Increase mining rewards
- D. Increase price volatility

14/ Which of the following is an example of a fiat-backed stablecoin?

- A. DAI
- B. PEPE
- C. ETH
- D. USDT

15/ What type of stablecoin is DAI?

- A. Crypto-backed
- B. Algorithmic
- C. Fiat-backed
- D. Non-fungible

16/ How do crypto-backed stablecoins maintain stability?

- A. Through fiat reserves
- B. c) By reducing supply
- C. By over-collateralizing
- D. By increasing price volatility

17/ What does DeFi stand for?

- A. Delegated Finance
- B. Direct Finance
- C. Digital Finance
- D. Decentralized Finance

18/ What is the primary benefit of using DeFi protocols?

- A. Centralized authority
- B. Intermediary services
- C. Transparency and reduced costs
- D. High transaction fees

25/ Which type of exchange is required to comply with KYC and AML regulations?

- A. Centralized Exchange (CEX)
- B. Decentralized Exchange (DEX)
- C. Peer-to-peer Network
- D. Blockchain Explorer

26/ Why is regulation important in the crypto industry?

- A. To restrict innovation
- B. To prevent fraud and protect consumers
- C. To eliminate all cryptocurrencies
- D. To increase transaction fees

27/ What does AML stand for?

- A. Anti-Money Laundering
- B. Allergic to Monday Life
- C. Automated Market Liquidity
- D. Alternative Monetary Legislation

28/ Which regulatory framework aims to create a unified approach to crypto assets in Europe?

- A. SEC
- B. UEFA Champions League
- C. MiCA
- D. FCA

29/ What is a CBDC?

- A. Crypto Backed Digital Coin
- B. Central Bank Digital Currency
- C. Collateralized Blockchain Digital Cash
- D. Cats Baking Delicious Cookies
